# MENU: 313 "Future Pricing Menu"

## Overview:

The future pricing feature enables the user to extract all items in a common future price group into workfiles where the resale prices and acquisition costs can be manipulated without affecting daily processing. When all values have been properly assigned they can be copes back to the inventory data base files.

A header file, IPVA, is the master control for each batch. There may be multiple headers for a single future price group if any of the following conditions exist:

- The price group was flagged as a temporary increase when it was created.
- Pricing by locations is active.
- Costing by location is active.

The header file is created by the option to Select/Delete price groups (ACP771).

In addition to the header file, each future pricing extraction will add records to the base price file (IPVB) and the master item file (IPVL). The base price file is populated when the option to "Create future price file" (ACP772) is taken.

If costing by locations is active, records will also be added to the supplier cost file (IPVC) when the user takes the option to "Create the Future Cost File" (ACP781).

## Option 1: "Select/Delete Price Groups"

This option is used to …

1. Screen IRR301D1 is displayed.

```
12/07/99                    SERVICE PARTS COMPANY                    IRR301D1
ALLISON1                  SELECT FUTURE PRICE GROUP                  AKING

 *Future price group ___

F3=Exit   F10=Field inquiry   F11=File inquiry   ENTER=Add
```

Key a future price group and press ENTER. IF you do not know a Future Price Group, press F10 = Field Inquiry for a listing.

2. Screen IRR301D2 is displayed. This screen displays …

```
12/07/99                    SERVICE PARTS COMPANY                    IRR301D2
ALLISON1                  SELECT FUTURE PRICE GROUP                  AKING

  Future price AG1  Description AGS - AMERICAN GRS

  Effective price date  0/00/00       Ending price date if temporary  0/00/00

 *Pricing location.... 9999 All locs

  Factor to be applied to item's base price 1.0000
  Factor to be applied to item's base Core  1.0000

  Update manufacturer's rank N

 User notes ____________________
